

ODIMMEGWA KAMSI KYRIAN

GAME DEVELOPER • UNITY / C#

+234 704 557 2288 • kyrianodimmegwa@gmail.com • github.com/vonzy81

PROFILE

Game developer with approximately three years of hands-on experience across personal and collaborative projects. Focused on Unity and C#, with practical experience building gameplay systems, first-person combat, enemy AI, weapon systems, game states, progression systems and prototypes. Comfortable collaborating with other developers and taking gameplay features from idea through implementation and iteration.

TECHNICAL SKILLS

Game Engine	Unity
Programming	C#
3D / Art	Blender
Game Development	Gameplay programming, FPS systems, enemy AI, weapon systems, UI/game states, game progression
Development	Git/GitHub, debugging, prototyping, collaborative development

SELECTED PROJECTS

VShooter | Unity / C# • Collaborative project

- Roguelike arcade shooter developed with a team of game developers.
- Features three stages with distinct bosses, enemies and environments, plus character-specific active/passive abilities.
- Gameplay includes experience-based leveling, randomized upgrade selection, combat, stage progression and boss encounters.

Last Live | Unity / C# • FPS Zombie Shooter

- Single-player first-person zombie survival game built around wave-based encounters and a one-life survival loop.
- Implemented game-state flow covering title, weapon selection, gameplay and game-over scenes.
- Built weapon mechanics including shooting, reload cooldowns, aiming/zoom, weapon selection and persistent player selection.
- Implemented zombie AI with Unity navigation, randomized spawning, wave progression and health interactions.
- Used ScriptableObjects to organize weapon and spawner data and improve gameplay structure.

GameplayMechanics-UE5 | Unreal Engine 5 / C++

- Gameplay-mechanics project exploring development with Unreal Engine 5.
- Structured UE5 project containing Config, Content and Source components, demonstrating exposure beyond Unity.

TowerBlast | HTML / CSS / JavaScript

- Interactive web project and portfolio experiment hosted on GitHub.

EXPERIENCE

Independent & Collaborative Game Development • Approximately 3 years

Developed personal projects and collaborated with friends on game-development work. Experience spans gameplay programming, prototyping, debugging, system implementation and iterative development in Unity/C#.

EDUCATION

Federal University of Technology, Owerri (FUTO)

Materials and Metallurgical Engineering • 300 Level
